

# TES Gifted and Talented Newsletter

## Events and Opportunities

The year has been off to a busy start! Students in the gifted and talented program have studied many academic units including leadership, cell structures, geometry, Newton's Laws of Motion, and robotics. We had a wonderful time on our field trip to Stage One to see The Best Christmas Pageant Ever and lunch at The Old Spaghetti Factory.

## Upcoming Opportunities

Next semester, I will continue to work with students at school twice a week and utilize Google Classroom on the days that I am at the high school. We hope to take a field trip in the spring but are still looking into options.

## Remind

If you have not signed up for Remind, text @bprosc to 81010 and you can receive notifications about upcoming events and opportunities!

As always, feel free to call or email if you have any questions or if there is anything I can do for you.

Thanks,  
Brandie Prosch
