Mrs. Hinton's Gifted & Talented

Dear Parents and Guardians

The first quarter of this school year has flown by! I have been so impressed by the excitement and dedication our students have shown to learn and grow each day! I have met with several students to set goals for the next quarter and will be meeting with many more the next few weeks.

Splitting my time between Spencer County Elementary and Middle Schools has given me an opportunity to learn and grow with these kids. I have watched my middle school students grow through high school Geometry (I have to remember myself) and classroom collaboration in all content areas. At the elementary school, I was impressed by the variety and depth of Science inquiry during our last unit and we will be working on some math and language skills over the next few weeks.

I will continue using Google Classroom for student assignments as well as to make announcements regarding field trips and other important dates. Have your child log in to their classroom and take a look at home! The class codes are SCMS: 8p85sl4 and SCES: co5fdb5. Let me know if they need help joining! Questions or concerns? Contact me at Elizabeth.Hinton@spencer.kyschools.us
